Objective

I seek challenging opportunities where I can fully use my skills for the success of the organization.

Experience

- Crescent Innovation and Incubation Council (CIIC)** Jul2024 - Aug2024
AI Intern
 - Gained hands-on experience in industrial automation by supporting the configuration and testing of the Volvo, RoboFlow system, focusing on optimizing assembly line sequencing and logistics.
 - Involved in computer vision model for automated plant disease deduction, utilizing image processing techniques to identify and classify pathologies with a high degree of accuracy.
- Codsoft** Jul2025 - Aug2025
Web Development Intern
 - Developed and deployed responsive, dynamic web applications from concept to completion using the HTML, CSS, and JavaScript tech stack.
 - Built functional web applications, such as calculators, landing pages, or portfolios, by translating design mockups into clean, efficient, and standards-compliant code.

Education

- Arunai Engineering college** 2022-2026
B.Tech-AI&DS
A+

Skills

- Java
- Python
- HTML
- Css
- JavaScript
- React.js

Projects

- 1.cryptocurrency Wallet Website**
 - Developed a fully-responsive single-page application using pure HTML, CSS, and JavaScript, featuring a dashboard for tracking cryptocurrency assets and market data.
 - Implemented form validation and error handling for the transaction simulation feature, ensuring a robust user experience with clear feedback messages.
 - Optimized website performance by minimizing reflows and repaints, implementing efficient DOM manipulation, and using debouncing on search inputs.
